

Statement of Work (SOW)

Project Title: Senior Citizen Digital Services App

Date: 9/2/2026

Prepared By: Mahindra University Team 31

1. Introduction

This Statement of Work (SOW) outlines the objectives, scope, deliverables, timeline, and responsibilities for the **Senior Citizen Digital Services App**, developed as part of the Software Engineering course at Mahindra University.

The purpose of this project is to design an integrated and easy-to-use digital application for senior citizens by configuring and integrating existing digital services rather than building them from scratch.

2. Scope of Work

Define the specific work to be completed, including the tasks and activities involved.

- **Project Description:** The Senior Citizen Digital Services App is an integration and configuration, based software project aimed at simplifying access to essential digital services for elderly users.
The application will combine multiple existing platforms such as healthcare services, digital payments, government services, reminders, and emergency support into a single, accessible interface designed specifically for senior citizens.
- **Objectives:** To provide a unified digital platform for senior citizens
 - To integrate existing digital services into one application
 - To simplify technology usage through an accessible user interface
 - To reduce dependency on others for routine digital tasks
 - To demonstrate integration and configuration-based engineering concepts
- **Key Activities:** Requirement analysis focusing on senior citizen needs

- Selection of existing digital services and platforms
- Integration of third-party services (healthcare, payments, government services)
- Configuration of user interface for accessibility (large text, simple navigation)
- Functional and usability testing
- Final deployment and documentation

3. Deliverables

List the tangible and intangible outputs of the project.

- **Deliverable 1:** Software Requirements Specification (SRS) and System Design Document – [Insert Date]
- **Deliverable 2:** Integrated Application Prototype (UI and service workflow) – [Insert Date]
- **Deliverable 3:** Final Project Report and Presentation – [Insert Date]

4. Timeline and Milestones

Provide a high-level timeline with key milestones.

Milestone	Description	Due Date
Project Kickoff	Initial project meeting	[Insert Date]
	Problem identification and requirement gathering	
Requirement Analysis & Planning	User analysis (senior citizens & caregivers)	[]
	Finalizing feature list and tech stack	
	System architecture design	
System Design & UI/UX	Database schema design (Firebase)	[]
	UI wireframes (large buttons, simple flow)	

Milestone	Description	Due Date
Firebase Setup & Authentication	Firebase project setup	
	User authentication implementation	[]
	Firestore database configuration	
Backend Development (Node.js)	API development for reminders and services	
	Scheduling logic for notifications	[]
	Emergency contact service implementation	
Android App Development	Frontend integration with backend	
	Reminder UI and service access screens	[]
	SOS emergency button implementation	
Notifications & Voice Support	Firebase Cloud Messaging integration	
	Push notification testing	[Insert Date]
	Basic voice assistance / text-to-speech	
Testing & Optimization	Functional testing	
	Usability testing with elderly-friendly focus	[]
	Bug fixes and performance optimization	

Milestone	Description	Due Date
Deployment & Documentation	Final build deployment	[Insert Date]
	Preparation of project report and presentation	
	Demo and evaluation	
	Final build deployment	
Submission	Preparation of project report and presentation	
	Demo and evaluation	

5. Roles and Responsibilities

Outline the key roles and responsibilities within the project.

- **Team Members:** Abhisha: Team Lead & System Architect
Sahithi: UI/UX & Accessibility Engineer
Meghana: Authentication & User Management Engineer
Sasya: Reminder & Notification Engineer
Jashitha: Emergency & Safety Features Engineer
Thrishagjna: Services Integration Engineer
Srinija: Testing, Quality & Deployment Engineer
 - **Client Contact:** Software Engineering course, Mahindra University
-

6. Assumptions and Constraints

List any assumptions and constraints that may impact the project.

- **Assumptions:** Senior citizens have access to a basic smartphone or computer with internet connectivity.
 - Users possess minimal digital literacy or have assistance from family members.
 - Required development tools and software are available to the project team.
 - Sample data used during development represents real-world scenarios.
 - Team members are available throughout the project for collaboration.
 - **Constraints:** Project must be completed within the given academic timeline.
 - Limited budget restricts use of paid APIs and premium services.
 - Application scope is limited to essential features due to time constraints.
 - Compliance with basic data privacy and security guidelines is required.
 - Performance may vary depending on user device and internet speed.
-
